The Sun Test
A piece of every piece of cloth that goes in Rogers Peet clothes is exposed to sun and rain for ten days. If it fades the goods are not accepted.

The Alkali Test
A piece of every piece of cloth that goes in Rogers Peet Suits is dissolved in a solution of caustic potash. If there's the slightest cotton residue—the goods are not accepted.

These are the tests adhered to today as rigidly as at any time in the past thirty years.

Thus the standard of Rogers Peet "all wool and fast color" clothes is maintained.
